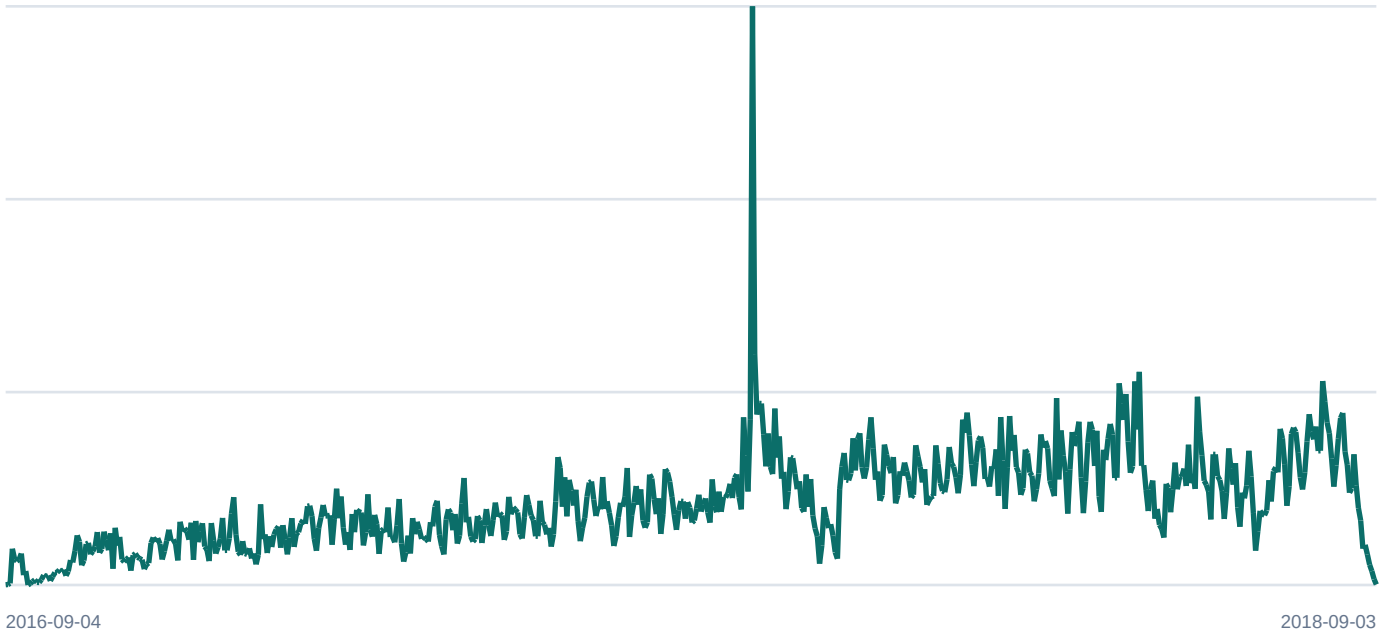
Management Overview

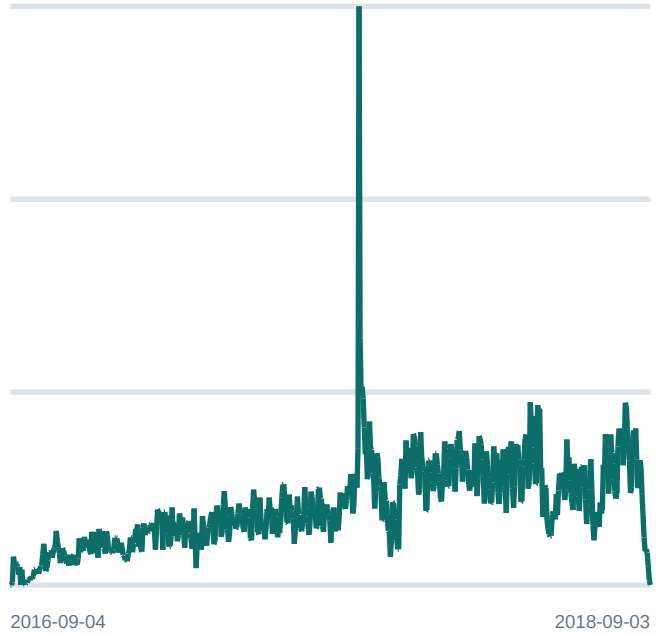
Olist commerce performance - descriptive evidence

MERCHANDISE VALUE	ORDERS	UNIQUE CUSTOMERS	AVERAGE ORDER VALUE
R$ 13.49M	98,207	94,990	R$ 137

Daily merchandise value



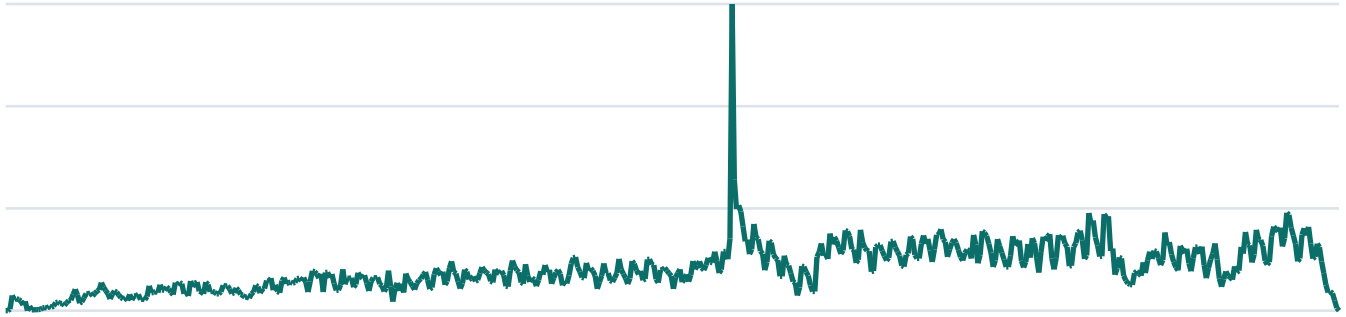
Daily orders



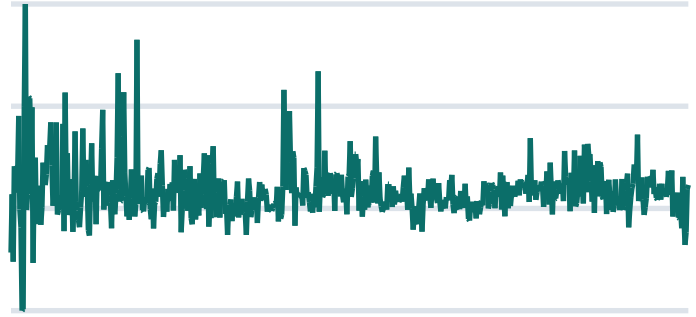
Revenue and Customer Growth

Cohort evidence and commercial demand

Daily customers



Average order value



Active customers by months since acquisition

Fulfillment and Seller Operations

Associations support prioritization; they do not prove causality

Average review score

On-time delivery rate

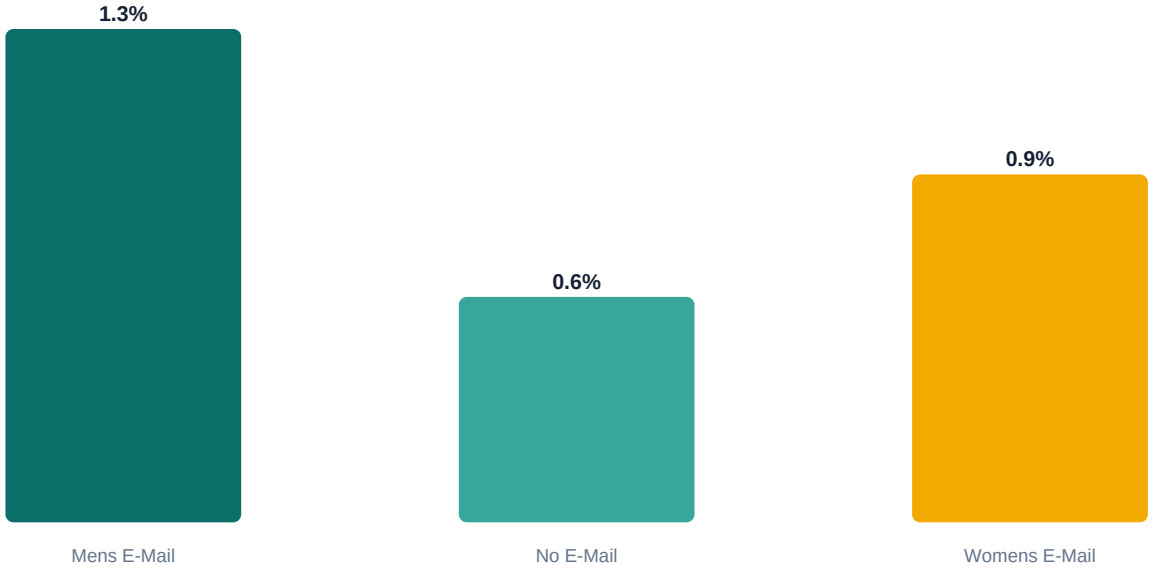
Priority-eligible sellers

Seller	Orders	Late rate	Review	Priority
S-aac8ac5374d2	3	66.7%	1.00	0.720
S-6de792d907de	6	66.7%	1.80	0.656
S-42e4c54893a8	3	66.7%	2.33	0.613
S-200da0e38179	3	66.7%	2.33	0.613
S-aa8cc1f431b0	16	56.2%	1.81	0.593
S-9666399f8365	9	55.6%	2.11	0.564
S-a504434c22d7	3	66.7%	3.33	0.533
S-b413530eae83	7	42.9%	1.67	0.524

Experiment Decision

Hillstrom randomized experiment - confirmatory conversion outcome

Conversion rate by randomized group



Primary outcome effects

Treatment	Abs. lift	95% CI	Holm p
Mens Email	0.68%	[0.50%, 0.86%]	0.0000
Womens Email	0.31%	[0.15%, 0.47%]	0.0002

MAX BASELINE |SMD|

0.0086

SRM P-VALUE

0.9037

Decision rule

Interpret effects only after source-key, SRM, baseline-balance, interval, and Holm checks pass.

Data Quality

Lineage, reproducibility, and interpretation guardrails

Latest audited source runs

Dataset	Run ID	Files	Status
hillstrom	baec6dc3-bc23-4596	1	Verified
olist	5830ceec-35a4-478e	9	Verified

Experiment assignment quality

Segment	N	Share	Duplicate k
Mens E-Mail	21,307	33.29%	0
No E-Mail	21,306	33.29%	0
Womens E-Mail	21,387	33.42%	0

Interpretation guardrails

- Commerce metrics are descriptive; delivery/review findings are associational.
- The two public datasets are independent cases and are never entity-joined.
- Raw customer, order, and seller identifiers are excluded from BI exports.
- Every headline statistic is generated from audited source runs.
